

M-240 Ambidextrous Mount

VTS is proud to introduce the M-240 Ambidextrous Mount

***Take your M-240C MGs to war-
Don't leave a significant portion of your firepower secured back at
home station!***

M-240 Ambidextrous Mount

VTS is proud to introduce the first M-240 mount capable of firing both the M-240 and the M-240C coaxial machine guns while mounted on the HMWWV or other army issue vehicles.

Specifically designed to allow deploying units to use the M-240C left behind in the arms rooms to increase firepower and increase weapons inventory in theater.
